Summary

Senior Android Developer with 4+ years building secure, scalable mobile apps for **fintech**, **branchless banking**, and **core banking**. Strong in **Kotlin**, **Jetpack Compose**, **MVVM**, and **Clean Architecture**. Experience integrating **conversational AI** (AXON-style assistant) for natural-language banking flows while preserving authentication, step-up checks, and audited payments. Track record of high crash-free rates and apps serving **200K+ monthly active users**.

Skills

- **Languages:** Kotlin, Java
- **UI/Frameworks:** Jetpack Compose, XML, Android Jetpack, Coroutines, Flow, Material Design
- **Architecture:** MVVM, Clean Architecture, modularization, Repository pattern, Use Cases
- **Security & delivery:** ProGuard, DexGuard, encryption, secure storage, CI/CD (Jenkins), Git
- **Data & APIs:** Retrofit, Room, REST APIs, Firebase, Dagger Hilt
- **AI integration (mobile):** conversational UX, intent routing, secure handoff to banking APIs, regulated payments workflows
- **Practices:** Agile/Scrum, code review, unit testing, performance tuning, crash analytics

Experience

Innovagic Technologies

Android Developer

May 2021 – Oct 2021

Rawalpindi, Pakistan

- Built responsive UIs with custom components and animations aligned with Material Design.
- Applied Android best practices and scalable patterns for production apps.

App in Snap

Android Developer

Nov 2021 – Jul 2025

Islamabad, Pakistan

- Owned features end-to-end for fintech and core-banking apps from design through release.
- Implemented modular **MVVM** and **Clean Architecture** with a clear Repository layer.
- Integrated REST APIs, third-party SDKs, and secure authentication flows.
- Improved stability and performance; automated build and release with **CI/CD** (Jenkins).

Roha Tech

Senior Android Developer

Aug 2025 – Present

Islamabad, Pakistan

- Lead development of branchless banking (**Aik Digital Wallet**) using **Kotlin** and **Jetpack Compose**.
- Own scalable **Clean Architecture** with MVVM, Coroutines, and **Hilt** dependency injection.
- Ship security hardening: encryption, **ProGuard/DexGuard**, and secure local storage.
- Integrate **AXON-style conversational AI**: voice/chat for balances, transfers, and bill pay with **intent understanding**, **step-up verification** for sensitive actions, and audited payment flows tied to existing modules.
- Partner with backend, QA, and design to deliver regulated, user-trustworthy releases.

Projects

AXON-style conversational AI (banking)

- Conversational layer on a production banking app: natural language for sign-in help, account queries, and payments.
- Mapped NL intents to secure app flows with session-aware APIs and compliance-friendly guardrails.

- Built assistant surfaces in **Jetpack Compose** with explicit confirmations, error handling, and state restoration so money movement stays traceable and user-intent aligned.

Aik Digital Wallet (Bank Islami)

- Branchless banking: transfers, bill pay, and top-ups (**Kotlin, Jetpack Compose**, Clean Architecture).
- Implemented IBFT, CNIC, and wallet-to-wallet send money; integrated Visa, Mastercard, and UnionPay with DexGuard/ProGuard.

Zindigi (branchless banking)

- Digital banking for spending, trading, and international payments; QR and transfer flows aligned with SBP expectations.
- International remittance integrations and in-app security improvements.

JS Mobile (core banking)

- Secure mobile banking for payments, accounts, and transfers; utility bill payments and BVS biometric SDK.
- Analytics integrations (AppsFlyer, Intercom) with privacy-aware configuration.

eChallan management system

- Traffic challan and payments for KPK and Islamabad Police; fine calculation and payment workflows.

North Central Railway ticketing (POS)

- POS ticketing with QR verification and printer integration; encrypted QR and operational tooling.

Education

Bachelor of Science in Information Technology

2017 – 2021

PMAS-Arid Agriculture University Rawalpindi

Rawalpindi, Pakistan

- Coursework: Mobile Application Development, Software Engineering, Database Systems, Cloud Computing, Computer Networks.

Leadership / Extracurricular

Technical leadership

Nov 2020

PMAS-Arid Agriculture University Rawalpindi

- Led a developer team in a university coding competition (planning through demo).
- Organized internal tech talks on Android development and engineering practices.

Community

- Contributed to open-source Android libraries; mentored junior developers at local meetups.
