Summary

Senior Android Developer with 4+ years of experience building secure, scalable, and user-friendly mobile apps in fintech, banking, and e-commerce. Expert in Kotlin, Jetpack Compose, MVVM, and Clean Architecture. Skilled in leading end-to-end app development, API integrations, performance optimization, and secure deployments. Proven record of delivering applications with 99.9% crash-free sessions and handling 200K+ monthly active users.

Skills

- **Languages:** Kotlin, Java
- **UI/Frameworks:** Jetpack Compose, XML, Android Jetpack, Coroutines, Material Design
- **Architecture:** MVVM, Clean Architecture, Modularization
- **Tools:** Git, Jenkins, Firebase, Retrofit, Room DB, CI/CD, Dagger Hilt
- **Other:** REST APIs, Secure Coding, Unit Testing, Debugging, Agile/Scrum

Experience

Innovagic Technologies

Android Developer

May 2021 – Oct 2021

Rawalpindi, Pakistan

- Developed responsive UIs with custom components and animations, following Material Design.
- Applied Android best practices and design patterns for scalable development.

App in Snap

Android Developer

Nov 2021 – Jul 2025

Islamabad, Pakistan

- Built and maintained fintech and core-banking apps from design to production.
- Implemented modular MVVM + Clean Architecture with Repository pattern.
- Integrated REST APIs, third-party SDKs, and secure authentication flows.
- Optimized performance, reduced crashes, and automated CI/CD pipelines.

Roha Tech

Senior Android Developer

Aug 2025 – Present

Islamabad, Pakistan

- Leading development of branchless banking apps (**Aik Digital Wallet**) using Kotlin + Jetpack Compose.
- Designed scalable Clean Architecture with MVVM, Coroutines, and Hilt DI.
- Delivered security features (encryption, ProGuard/DexGuard, secure storage).
- Collaborating across backend, QA, and design teams to ship secure, user-friendly apps.

Projects

Aik Digital Wallet (Bank Islami)

- Branchless banking app enabling money transfers and bill payments. (Kotlin, Jetpack Compose, Clean Architecture)
- Implemented Send Money (IBFT, CNIC, Wallet-to-Wallet), Bill Payments, and Top-ups.
- Integrated Visa/Mastercard/UnionPay gateways with secure DexGuard/ProGuard protection.

Zindigi (Branchless Banking Application)

- Digital banking platform for online spending, trading, and international payments.
- Developed funds transfer and QR payments compliant with SBP regulations.
- Integrated international remittance services and enhanced in-app security.

JS Mobile (Core Banking Application)

- Secure mobile banking app for payments, account access, and fund transfers.
- Added utility bill payments, biometric verification (BVS SDK), and analytics (AppsFlyer, Intercom).

eChallan Management System

- Traffic challan/payment solution for KPK and Islamabad Police.
- Automated fine calculation, payment workflows, and challan history tracking.

North Central Service Railway Ticketing System

- POS ticketing app with QR-based verification and printer integration.
- Enabled real-time validation, encrypted QR codes, and daily operations management.

Education

Bachelor of Science in Information Technology

2017 – 2021

PMAS-Arid Agriculture University Rawalpindi

Rawalpindi, Pakistan

- Relevant Coursework: Mobile Application Development, Software Engineering, Database Systems, Cloud Computing, Computer Networks

Leadership / Extracurricular

Technical Leadership

Nov 2020

PMAS-Arid Agriculture University Rawalpindi

- Led a developer team in a university coding competition, overseeing planning, development, and final presentation.
- Organized internal tech talks on Android development, best practices, and emerging tools.

Community Involvement

- Contributed to open-source Android projects and libraries, strengthening the developer ecosystem.
- Mentored junior developers at local coding meetups, fostering Android skills and career growth.
